Mazatlán, Sinaloa 82000
MEXICO

Dear Michel,

The enclosed manuscript (MS # 97-47) has been submitted for possible publication in the *Proceedings of the Biological Society of Washington*. The *Proceedings* seeks to publish only original work of high merit. This requires a careful, thoughtful, and impartial reviewing process. Your valuable opinion of the enclosed manuscript would be much appreciated.

To assist you I enclose the following documents: 1) a form entitled "Reviewers Comments" (2 copies), intended for the author(s); 2) a "Rating Form" exclusively for my use and that of the general Editor; and 3) a page with "Suggestions for Reviewers", for you to consider. After completing the review, return to me all copies of the "Reviewers Comments" and the "Rating Form", along with the manuscript. Please be as thorough, candid, and constructive as you can, but do not indicate to the author, in any place, acceptance or rejection of the manuscript. That decision will be made by the Associate Editor. Specific suggestions written directly on the manuscript are encouraged.

If you cannot complete the review within a month, if you do not have the time to review the manuscript, or feel that you are not an appropriate reviewer, please return the manuscript immediately. In that event, I would be grateful for your suggestions of other expert reviewers.

Thanks in advance for your help in this important process.

Sincerely,

[Signature]

Rafael Lemaitre
Associate Editor
