Dear Dr. Hendrickx:

In December you reviewed for Deep-Sea Research-I the manuscript by Wicksten and Packard, “A qualitative zoogeographic analysis of decapod crustaceans of the Continental Slopes and Abyssal Plain of the Gulf of Mexico”. A revised version of the paper has been accepted and sent to press for publication. I have enclosed the reviews, the editor’s instruction letter to the authors, and the authors’ reply to the reviews.

Thank you for your assistance to me and to the journal.

Sincerely,

[Signature]

Michael P. Bacon
