To Whom It May Concern:

This letter is to indicate that Dr. Michel E. HENDRICKX, Laboratorio de Invertebrados Bentonicos, Unidad Academica Mazatlan, MEXICO, has been solicited, in agreement with the editor of the series Patrimoines Naturels of the Muséum national d'Histoire Naturelle, Paris, to review the following draft paper (written in French):

Dr. Michel E. HENDRICKX has been chosen as being one the best taxonomic expert for crustacean fauna of the eastern Pacific and because he his fluent in French. He has carefully reviewed the manuscript and has transmitted several corrections and suggestions: addition of several key references that were overlooked by the authors; remarks in the discussion section for correct interpretation of the results; peer correction of the list of species, especially the list of pelagic and bathypelagic species that was proposed by the authors in the vicinity of Clipperton atoll.

Overall, Dr. Michel E. HENDRICKX review has helped to improve this work on Clipperton fauna and his collaboration was greatly appreciated.

Sincerely yours,

POUPIN Joseph, Ph.D.
Associate collaborator at the Muséum national d'Histoire naturelle, Paris
Professor of Marine Biology & Computer Science at the French Naval Academy
Institut de Recherche de l'Ecole Navale
